Asset Based Functionality Creation Through Disposition

An asset is endowed with certain inalienable qualities by its creator.

Each asset has a unique identity, a location, and the ability to generate revenue, incur costs, and serve as a conduit for funds.

Generally an asset is attached to one or more lease agreements for as much of its useful life as possible.

Throughout the portion of its life spent on lease, however, the asset retains its full complement of inalienable qualities.

At its disposition, an asset can calculate its overall return, regardless of the number of leases it has been attached to or the various configurations in which it has participated.
